DON'T MISS NDT BEYOND COMPLIANCE 17-19 OCTOBER 2010

RUSSELL'S DESKTOP

Dear Customers

Why do we do it? Three Exhibitions in three months is big for us. **ANZFSS** (Australian New Zealand Forensic Science Symposium) September, **AINDT** October, **Corrosion & Prevention** November. ANZFSS was huge and fortunately in Sydney. 957 full time delegates (Police & Scientists) kept us very busy for 4.5 days. Results so far have been excellent.

We have welcomed two new staff. Warren Robertson in sales who replaced John who left after 8.5 years and Erna Reynaers our accountant fresh from South Africa.

We are looking forward to the Beyond Compliance Exhibition in Melbourne where we will have several of our suppliers from overseas joining with us on our stands (11, 12, 13). We will be releasing some new products at the show and look forward to seeing many of you there.

Regards
Russell

EAGLE EYE HEADLAMP KIT

EK-3000 EagleEye Headlamp

The new EagleEye™ EK-3000 Headlamp Kit features the EE-365 lamp with two ultra-high intensity UV-A LEDs for inspection, plus a three-LED white light assembly for general illumination.

An included lamp mount/sprayer allows the lamp and MPI to be mounted together for single-handed NDT/yoke inspection. An adjustable strap allows the lightweight, palm-sized unit to be worn on a helmet or directly on the head for hands-free operation!

NOW IN STOCK

Digital Real Time Display

MFE Scan Studio

RFS is proud to announce the release of MFE Enterprises' new and improved Mark III lineup. The Mark III Floor Scanner addresses many issues faced by the modern day tank inspector, such as improved inspections through coated floors, improved inspections through thicker plates, fully adjustable thresholds for improved thresholding techniques, and the ability to produce color-coded maps of carbon steel loss across the tank floor. Initially, the Mark III Floor Scanner will be available in three different models: Manual Operation; Stop-On-Defect; Color Map.
